

ARFF: 6-30-21: Serps, Threadles, Tunnels

This portion of an Excellent AKC JWW course per Steve Larson offers great practice on serpentes and threadles. With serpentes, keep moving, and figure out ahead of time where you want to be at the end of the serpentine. That'll largely dictate which side of the serpentine you want to be on.

ARFF: 6-30-21: Serps & Tunnels

Fast-moving course. Try crosses after #4, #7, and #13. How to handle the long line from #7 to the tunnel at #11?

Identify the serpentine. Figure which side of each you want to be on. Look at where the wings are and where they present a challenge to your path and adjust accordingly. I suggest landing side crosses after #3 and #5 to set you up for the consecutive serpentine. Have fun!
