

ARFF 7-20-22 Finding the Tunnel Entry

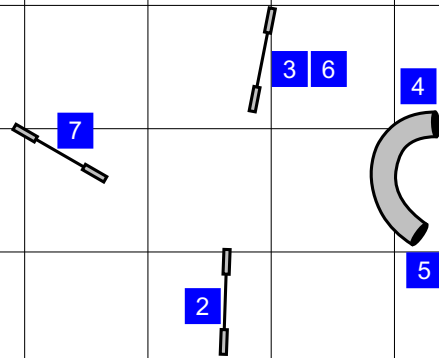

You'll be running behind the tunnel in these exercises. If your dog is not used to finding a "hidden" tunnel entry, help him by bringing him to "X" and first send him from there before starting this sequence.

Note the tweaked jumps (in red). Your dog will have to find the far end of the tunnel after the pinwheel. You might start him on the search at "X" and increase the distance. You'll probably need a front or a blind cross after #3.

Here your dog will be making essentially a U-turn into the tunnel. Reward his success.

Here your dog will have to find a blind entry to the tunnel after wrapping jump #3. Note the back-to-back tunnels.
