

ARFF 8-30-23: Jumps, Tire and Weaves

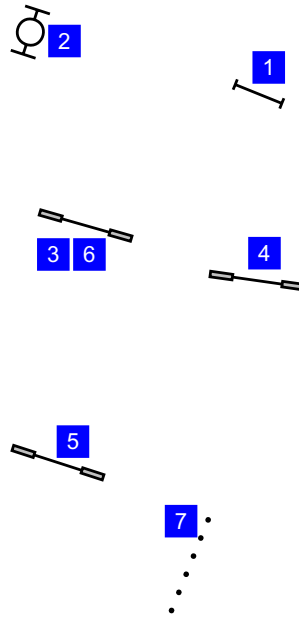

You can handle this sequence with your dog on the right. How much babysitting do you need to do to get him into the weaves?

Will a blind cross after #5 followed by an immediate front cross help you get the turn to the #8 tire?

If you turn your dog left over #2, he'll get a better look at the tire. A front cross after #4 (to get him on the left) will help draw the line over #5 to the weaves.

Tricky. You may want to try a blind cross after #3 to get your dog on the left for the rest of the sequence.
