

**6-7-23: Tunnel & Weave Medley**  
 Based on a course from L. Mecklenburg's **Developing Handling Skills**  
 Lots of twists and turns and a serpentine entry to weaves

Try leading out to get the correct end of the tunnel at #2. A rear cross at #5 may work best. Can your dog handle the weave entry? Can he handle your crossing behind him to get to #9?

If you run #1-#3 as a serpentine with your dog on the right, can you get an offside entry to the weaves that will enable you to reach #4? How will you manage #5-#7? Try this one in pieces; it's pretty tricky.
