

OMD Ex 2

From One Mind Dogs: Good exercise for sending to blind entry of a straight-ahead tunnel and sending out to the middle jump on a pinwheel. (Distance). If your dog doesn't send to the blind end of a tunnel, work on that first, perhaps with a bait plate.

Techniques you can try on this course

Lateral Push
Blind Cross
V-set
Front Cross
Japanese
False Turn
Reverse Spin

Handling Suggestion:

- Start dog on right, send out to #3 with a **Lateral Push** to give yourself time to get to a **Blind Cross** between #4-5 (do it early and focus on re-connecting if you want to avoid that tunnel suck!)
- **V-set** on #5 if needed.
- Send to blind tunnel entry #6 and get moving to do a **Blind Cross** before #7.
- **Lateral push** to a **Front Cross** on #8 – aim to be positioned between jump #7 and #9 when doing the Front Cross to give you time to do a **Japanese** on #9.
- You can also try a **False Turn** on #8-9.
- Send to the tunnel #10, do a **Blind Cross** after and **Backside send** and **Reverse Spin** #11.
